5. Purpose of Use:

A. Existing Use of the Water Right

PURPOSE OF USE	GPM or CFS	ACRE-FT/YR	PERIOD OF USE
Irrigation	0.9 cfs	292.5 af	May 1 – September 15
Stockwater	1 cfs	5 af	September 16 – April 30

B. Proposed Purpose of the Trust Water Right:

DESCRIBE THE PURPOSE(S) OF USE DURING THE PERIOD OF TRUST:	
PURPOSE OF USE	ACRE-FEET/YR
To change a <i>portion</i> of the water right from irrigation use to use as trust water for the benefit of instream flows in the Teanaway River. We request this water right be protected and exercised as instream flow from May 1 – September 15, in perpetuity, in the quantity shown to the right.	At least 162.5 af but not more than 172.5 af
*First and foremost, at least 120 acre feet of the 292.5 af will remain with the property for irrigation of 45 acres.	Depends on outcome of ROE.

6. Place of Use:

A. Existing:

LEGAL DESCRIPTION OF LANDS WHERE WATER IS PRESENTLY USED:							
That portion of SE ¼ SE ¼ of Section 28, and NE ¼ NE ¼ of Section 33, T. 20 N., R. 16 E.W.M. lying southwesterly of the Masterson Ditch.							
¼	¼	SEC.	TWP.	RGE.	COUNTY	PARCEL #	# OF ACRES
		28 & 33	20	16	Kittitas		45
DO YOU OWN ALL THE LANDS IN THE EXISTING PLACE OF USE? <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO – IF NO, PROVIDE OWNER(S) NAME: Wilbur H. Mundy and Mary Ann Mundy 2500 Canterbury Ln. E. #301 Seattle, WA 98112							
Ditch/delivery conveyance water followed the contours of a 3-mile ditch along Red Bridge Road and over the ridge, as described below. It is not visible from aerial photos. "The Masterson Ditch trace is still observable on the ground. Its diversion is on the downstream side of Red Bridge Road (right at the road's bridge over the Teanaway) on the Teanaway's right bank. It runs westerly a couple of hundred yards and crosses under the Red Bridge Road to the north side, running at elevation at the base of the hill and slowly traversing higher and higher on the slope as one travels west. Near the point where the Red Bridge Road junctions with the Masterson/Seaton Road, the ditch actually runs straight westerly across that top of the ridge (not looping around that toe of the ridge) and then drops to the Mundy/Masterson POU. It's hard to locate the ditch on any aerial photo, since the ditch runs along and through the forested slope." Stan Isley, Court Appointed Water Master for Teanaway River, via email, 5/4/2010. This original upstream Point of Diversion is described as follows: 900 feet south and 350 feet east from the north quarter corner of Section 25, being within the NW ¼ NE ¼ of Section 25, T. 20 N., R. 16 E.W.M.							

6. Place of Use (continued)

B. Proposed:

IDENTIFY THE WATER BODY TO BE BENEFITED OR OTHER PLACE TO BE BENEFITED

Place of Use for May 1 – September 15, in perpetuity: Teanaway River for instream flow enhancement, for the benefit of fish and wildlife.

Remarks and Other Relevant Information:

Appendix A Background
Appendix B Acceptance of Donation
Appendix C Project Map
Appendix D Consumptive Conveyance Water

This Trust Water transfer benefits the Teanaway River by decreasing temperatures, increasing flows, contributing to wet habitat cover for fish, aquatic insects and riparian species. The Teanaway River has been cited through CWA 303d for low flows and high temperature. Steelhead, bull trout, and Spring Chinook all inhabit the river and use it as spawning grounds. There is also a Yakama Nation acclimation facility for Spring Chinook, with possibility for coho reintroduction in the future.

Bill and Mary Ann Mundy have submitted another application to transfer water to the Trust Water Right Program that has been assigned Ecology tracking No. CS4-01467012sb3c. This application is intended to relate to the conveyance water under contract with WWT and Ecology.

This refers to the application discussed here, submitted by WWT.

Submitted by Mentor Law to develop a mitigation bank on behalf of the Mundys. It has nothing to do with Conveyance water under contract with WWT.
